

**Cocoon Coatings** provides waterproofing solutions for an array of commercial applications. We implement the latest product technology and techniques in application to resolve our client's issues.

Our longevity within the industry highlights our quality of workmanship, constantly modifying our training and site applications with new techniques and project experiences from around the world.

Our workmanship principle is to deliver an outcome that exceeds our client's expectation.

### **Industrial waterproof and surface coating**

#### **Project aim:**

Scope: waterproof penetrations and exposed surface. Surface area was also exposed to direct U.V. and pedestrian traffic.

- ❖ Waterproof penetrations and traffic area

*"Providing adequate thermal comfort and waterproofing services is integral to the provision of high quality educational facilities across the state."*

**- The Hon James Merlino MP  
Minister of Education**

*"The heat load has been reduced internally by 5-8°C and has been so successful that additional roofing around the facility has also been treated."*

**- Terrona Ramsay  
Former CEO/DON of KRHS**

*"Cocoon coating improves the thermal performance of the project. The nanoceramic in the membrane genuinely reflects heat more effectively than regular paint."*

**- Judith North  
Architect Director of NOWarchitecture**
